

Antonie Ochisor

BSc. Cybersecurity Undergraduate

EDUCATION

- LCI “Prometeu Protalent” - High School (2019 - 2023)
- BSc Of Cybersecurity - Howest (2023 - currently)
- Waterpolo Player - Partizan Tg.Mures (2017-2022)

EXPERIENCE

Security Tool Engineer – Mobile Trojan Project

Mobile Security - Howest University | 2025

- Engineered a proof-of-concept mobile trojan within an isolated testing environment to research Zygote parent process injection vectors and package hijacking mechanics.
- Implemented precise custom signature injection workflows by decompiling, injecting, altering, and re-signing application packages to demonstrate application tampering vulnerabilities and malware persistence mechanisms.

API Honeypot & Threat Detection Suite

Web Security Honeypot - Howest University | 2025

- Architected a secured api CTF honeypot application framework designed to catch and flag malicious web traffic requests.
- Integrated the full ELK Stack (Elasticsearch, Logstash, Kibana) alongside Grafana monitoring to view real-time logs and alerts of active exploitation attempts.

IoT Security & Analytics Participant – Hack The Future

HackTheFuture Hackathon | Industry 5.0 Challenge

- Configured a localized ELK Stack and Grafana ecosystem to ingest, parse, and structure continuous MQTT telemetry streams transmitted from active IoT endpoints.
- Engineered real-time visual dashboards mapping physical and digital telemetry vectors, including industrial air pressure fluctuations, water flow metrics, and electronic authentication logs from digital locking mechanisms.

Knowledge & Toolset

- Operating Systems
- Penetration Testing
- Network | Web Security
- Digital Forensics
- Vulnerability Assessment
- Low Code Enthusiast
- Python
- Java
- Javascript
- BurpSuite | Owasp ZAP
- Nmap | Wireshark
- Docker
- ELK Stack | Grafana

Spoken Languages

- Romanian (Native)
- Russian (Native)
- English (C1)
- French (A2)
